<sup>1/</sup> It is noted that petitioner's construction permit expires on October 15, 1994. Because of the extreme weather conditions existing in the Kalispell area of Montana for most of the winter, any expedited action that the Commission can take on this upgrade proposal would be appreciated, to the end that a construction permit for the upgraded facilities may be issued by next spring so that construction can take place during the summer months, which are the only months in which construction is possible at the high elevation of the transmitter site.
